Allen and Rebecca

Thank you for your patience with us. We have been trying to find open times that work for everyone. Here are some slots that work for all the offices you requested we include. Let me know which one works for you and your team. Then I will be glad to send out an invite.

Doug, thanks for the quick reply.

We agree that engagement with the New Chemicals Branch early is crucial. We anticipate that the work of the Existing Chemicals Branch on chlorinated solvents may inform the New Chemicals Branch assessment of our PMN substance. For that reason, we'd like to have an introductory discussion with both Branches to share information and discuss the impact of the AIM Act on their activities.

Best Regards,
Allen KARPMAN

Hello Allen

We have a quick question. Have you started engaging the people in the New Chemicals Division here at EPA regarding the PMN? I think the general advice is to engage with the new chemicals team early in the process.

Thanks, doug

Dear Doug,

Following up on our virtual meeting with the Alliance for Responsible Atmospheric Policy, Arkema would like to meet with EPA to discuss our use of chlorinated feedstocks for the manufacture of fluorogases and the anticipated impact of the AIM Act on our activities.

We currently use DCM and TCE, and submitted a substantial quantity of use and exposure information to the Agency during the Risk Evaluation process. We have also announced plans to manufacture a HFO at our Calvert City, KY plant, for which we plan to use a chemical not currently on the TSCA inventory.

We therefore request that the meeting include someone from the New Chemicals branch (our EHS person suggested Madison Lee) and someone from the Air Office (Ozone Protection – Cindy Newberg's team).

Please give us a few options in the first half of September to have the right team(s) available.

Best Regards,

Allen KARPMAN
